CASE # 26415

1 1. That in years when there is runoff, there are unappropriated
2 waters in the source of supply that can be put to the use proposed by
3 the Applicant, in the amount the Applicant seeks to appropriate, and
4 throughout the period during which the Applicant seeks to appropriate
5 the amount requested is available.

6 2. That the Objector has a valid existing water right for the
7 irrigation of approximately 40 acres.

8 3. That when water is available for appropriation by the Applicant,
9 there is sufficient water available to satisfy the needs of the Objector
10 also.

11 4. That the proposed means of diversion and construction are
12 adequate.

13 5. That the proposed use of water is a beneficial use.

14 6. That there are no planned uses or developments for which permits
15 have been issued or for which water has been reserved that may be adversely
16 affected by this proposed use.

17
18 PROPOSED CONCLUSIONS OF LAW

19 1. Section 85-2-311, MCA, 1979, states that, "The Department shall

3. It is concluded that the rights of prior appropriators will not be adversely affected by the granting of this permit.

4. It is concluded that the proposed use of water is a beneficial use.

5. It is concluded that the proposed means of diversion or construction are adequate.

6. It is concluded that the proposed use will not interfere unreasonably with other planned uses or developments for which a permit has been issued or for which water has been reserved.

7. Nothing decided herein has bearing on the status of water rights claimed by the Applicant other than those herein applied for, nor does anything decided herein have bearing on the status of claimed rights of any other party except in relation to those rights herein applied for, to the extent necessary to reach a conclusion herein.
